

LiteFit

LiteFit is an innovative pocket spring system that optimizes the number of turns, offering lightweight and cost advantages in mattress cores. Developed with Boyçelik's years of experience, LiteFit offers many efficient and sustainable features in the production and usage processes.

Sustainable: LiteFit stands out as an eco-friendly product. Its lightweight design minimizes its carbon footprint, reducing its negative impact on the environment to the lowest level.

Durability and Longevity: Manufactured with Boyçelik's years of experience and superior wire quality, LiteFit delivers exceptional durability and comfort, ensuring a long-lasting, high-quality product.

Lightweight Design: LiteFit is an exemplary design with reduced spin counts. This innovative approach not only reduces the weight of the springs but also ensures ease of use.
